SteamAPI32.dll 0x0000007d (2.88) or one of its required dependencies. via. Dec 11, 2019 Ok, so i just finished up with walking through that guide, and I also have solved my problem.... I am having the same problem, exactly. I used the 'fix specific versions' option, and got the error "could not find steam_api" when launching the game. Tried applying a fix from another thread, got "missing dll steam_api.dll". Clicked OK and got this: "Could not load file or assembly 'SteamAPI, Version=1.0.0.0, Culture=neutral, PublicKeyToken=2322c7f375b14a89' or one of its dependencies. The system cannot find the file specified. [GLEW.EXE] glew32.dll" Then it said "could not find steam_api.dll" in game. Followed the steps on the link and it finally loaded. No other changes to system. Tried at least 5 times before I found the solution in this thread. I have successfully used the.zip in the games' folder, and have successfully gotten to steam. Thanks to all of the people helping out here. Nov 23, 2020 'Process Information:... ..SteamAPI.DLL 0x0000000d (2.88) or one of its required dependencies was not found.
